Report No: CCISE160203705

FCC REPORT

Applicant: NEXUS TELECOM SERVICES (HK) LIMITED

Address of Applicant: R112, 11/F Hollywood Plaza, Mangkok, Kowloon, Hong Kong

Equipment Under Test (EUT)

Product Name: Mobile Phone

Model No.: GO779

Trade mark: GOMOBILE

FCC ID: 2AHDFGO779

Applicable standards: FCC CFR Title 47 Part 15 Subpart B

Date of sample receipt: 29 Feb., 2016

Date of Test: 29 Feb., to 11 Mar., 2016

Date of report issued: 11 Mar., 2016

Test Result: Pass *

Authorized Signature:

Bruce Zhang Laboratory Manager

This report details the results of the testing carried out on one sample. The results contained in this test report do not relate to other samples of the same product and does not permit the use of the CCIS product certification mark. The manufacturer should ensure that all products in series production are in conformity with the product sample detailed in this report.

This report may only be reproduced and distributed in full. If the product in this report is used in any configuration other than that detailed in the report, the manufacturer must ensure the new system complies with all relevant standards.

This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 90 days only.

^{*} In the configuration tested, the EUT complied with the standards specified above.

|--------------------|-------------------|--------|--|--|
| Conducted Emission | Part 15.107 | Pass | | |
| Radiated Emission | Part 15.109 | Pass | | |

Pass: The EUT complies with the essential requirements in the standard.

5 General Information

5.1 Client Information

| Applicant: | NEXUS TELECOM SERVICES (HK) LIMITED |
|--------------------------|---|
| Address of Applicant: | R112, 11/F Hollywood Plaza, Mangkok, Kowloon, Hong Kong |
| Manufacturer: | United Creation Technology Co.,Ltd. |
| Address of Manufacturer: | Room 201, Block A, Science & Technology Building Phase-II, Nanhai Av. 1057, Nanshan, Shenzhen, China |
| Factory: | HuiZhou YouLianXing Electronic Science & Technology Co., Ltd. |
| Address of Factory: | F2, Standard Fctory Building, No 3, Qunle Road, Ma an Town, Huicheng District, Huizhou City 516057, China |

5.2 General Description of E.U.T.

| Product Name: | Mobile Phone | |
|---------------|--|--|
| Model No.: | GO779 | |
| Power supply: | Rechargeable Li-ion Battery DC3.7V-1300mAh | |
| | Model: GO779 | |
| AC adapter : | Input:100-240V AC, 50/60Hz 0.12A | |
| | Output:5V DC MAX500mA | |

5.3 Test Mode

| Operating mode | Detail description |
|-------------------------|--|
| PC mode | Keep the EUT in Downloading mode(Worst case) |
| Charging+Recording mode | Keep the EUT in Charging+Recording mode |
| Charging+Playing mode | Keep the EUT in Charging+Playing mode |
| FM mode | Keep the EUT in FM receiver mode |
| GPS mode | Keep the EUT in GPS receiver mode |

The sample was placed 0.8m above the ground plane of 3m chamber. Measurements in both horizontal and vertical polarities were performed. During the test, each emission was maximized by: having the EUT continuously working, investigated all operating modes, rotated about all 3 axis (X, Y & Z) and considered typical configuration to obtain worst position, manipulating interconnecting cables, rotating the turntable, varying antenna height from 1m to 4m in both horizontal and vertical polarizations. The emissions worst-case are shown in Test Results of the following pages.

Report No: CCISE160203705

5.5 Laboratory Facility

The test facility is recognized, certified, or accredited by the following organizations:

• FCC - Registration No.: 817957

Shenzhen Zhongjian Nanfang Testing Co., Ltd. EMC Laboratory has been registered and fully described in a report filed with the (FCC) Federal Communications Commission. The acceptance letter from the FCC is maintained in out files. Registration 817957, February 27, 2012.

• IC - Registration No.: 10106A-1

The 3m Semi-anechoic chamber of Shenzhen Zhongjian Nanfang Testing Co., Ltd. has been Registered by Certification and Engineering Bureau of Industry Canada for radio equipment testing with Registration No.: 10106A-1.

• CNAS - Registration No.: CNAS L6048

Shenzhen Zhongjian Nanfang Testing Co., Ltd. is accredited to ISO/IEC 17025:2005 General Requirements for the Competence of Testing and Calibration laboratories for the competence of testing. The Registration No. is CNAS L6048.

5.6 Laboratory Location

Shenzhen Zhongjian Nanfang Testing Co., Ltd.

Address: No. B-C, 1/F., Building 2, Laodong No.2 Industrial Park, Xixiang Road,

Bao'an District, Shenzhen, Guangdong, China

Tel: +86-755-23118282 Fax: +86-755-23116366

| Test Procedure: | The EUT was placed on the top of a rotating table 0.8 meters above the ground at a 3 meter semi-anechoic camber. The table was rotated 360 degrees to determine the position of the highest radiation. The EUT was set 3 meters away from the interference-receiving antenna, which was mounted on the top of a variable-height antenna tower. The antenna height is varied from one meter to four meters above the | | | | | | | |
|---------------------|---|--|--|--|--|--|--|--|
| | ground to determine the maximum value of the field strength. Both horizontal and vertical polarizations of the antenna are set to make the measurement. | | | | | | | |
| | 4. For each suspected emission, the EUT was arranged to its worst case and then the antenna was tuned to heights from 1 meter to 4 meters and the rotatable table was turned from 0 degrees to 360 degrees to find the maximum reading. | | | | | | | |
| | The test-receiver system was set to Peak Detect Function and Specified Bandwidth with Maximum Hold Mode. | | | | | | | |
| | 6. If the emission level of the EUT in peak mode was 10dB lower than the limit specified, then testing could be stopped and the peak values of the EUT would be reported. Otherwise the emissions that did not have 10dB margin would be re-tested one by one using peak, quasi-peak or average method as specified and then reported in a data sheet. | | | | | | | |
| Test environment: | Temp.: 25 °C Humid.: 55% Press.: 1 01kPa | | | | | | | |
| Measurement Record: | Uncertainty: ±4.88dB | | | | | | | |
| Test Instruments: | Refer to section 5.7 for details | | | | | | | |
| Test mode: | Refer to section 5.3 for details | | | | | | | |
| Test results: | Passed | | | | | | | |
